

## EX-TN 110 Toner Cleaning Unit

**% 100 Healthy...**

*Don't inhale toxic toner dust while refilling!*

## General Features

- Specially designed for toner dust vacuuming for cleaner environment
- "Long-life" filters 15,000 hours
- %99,98 Efficiency filtering particulates as small as 0,2 microns
- No maintenance system
- Low noise
- Power and soft vacuuming options
- Pneumatic hand tool variations
- Electrically grounded to prevent build-up of static electricity
- Lightweight and easily maneuverable unit
- Retractable toner capture drawer
- Ergonomic, toner vacuum suitable for restricted and cramped conditions
- Dust bin easy to remove

## Technical Features

Mode	: EX-TN 110 Toner Vacuuming Unit
Places to use	: To vacuum toner dust where its needed, capture the toner dust for clean work surface while filling toner cartridges.
Filter	: 1 removable cartridge type filter that filters to the DIN EN 60335 standard for CLASS M specks.
Filter Life	: 15,000 hours /Cleanable filter-jut pulse system.
Vacuum	: Electrically grounded to prevent build-up of static electricity during vacuuming.
Noise level	: Low noise level
Toner dust collection	: Retractable toner capture drawer.
Metal body	: Electrostatic paint
Engine	: 0.75 W
Voltage	: 220 V / 50Hz
Vacuum flow rate:	: 1000 m3/h
Machine Size	: Width 450 mm Length 650 mm Height 1400 mm Weight 80 kg
